

CALL 911

Dear Friends and Neighbors,

Some people still think they should only call 911 in a dire or life-threatening emergency.

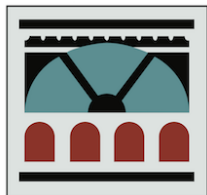

This is not the current guidance from the CPD.

Every call to 911 creates a record that helps city officials make resource allocation decisions. OEMC operators triage each call to determine an appropriate response, so citizens don't need to worry about whether a situation is serious enough for a call to 911.

Bottom line: if you are aware of a situation involving public safety, please call 911 immediately.

Thank you.
